

## Appendix E

### Quality of Wins Index for Team Sport Tie-Breakers

QOW used for: baseball, basketball, soccer, softball, tennis and volleyball

Win on the road versus a team at or above .667—15 points

Win at home versus a team at or above .667—14 points

Win on the road versus a team at or above .500, but below .667—13 points

Win at home versus a team at or above .500, but below .667—12 points

Win on the road versus a team at or above .333, but below .500—11 points

Win at home versus a team at or above .333, but below .500—10 points

Win on the road versus a team below .333—9 points

Win at home versus a team below .333—8 points

Loss on the road versus a team at or above .667—7 points

Loss at home versus a team at or above .667—6 points

Loss on the road versus a team at or above .500, but below .667—5 points

Loss at home versus a team at or above .500, but below .667—4 points

Loss on the road versus a team at or above .333, but below .500—3 points

Loss at home versus a team at or above .333, but below .500—2 points

Loss on the road versus a team below .333—1 point

Loss at home versus a team below .333—0 points

Points for tied contests are calculated by taking the points which would have been awarded with a win, adding the points which would have been awarded with a loss and dividing by two.

The quality-of-wins index is calculated by adding the total number of points and dividing by the number of games.

A neutral game is defined as being at a site where neither team practices or plays its regular home games and, as such, is awarded as if it were an away game.

The quality-of-wins index is calculated based on end of season record and for Conference contests only

Conference Commissioner and President to determine QOW index score
